

FUNDRAISING CAMPAIGN DURING THE EWMA BRUSSELS CONFERENCE

EWMA2011
25-27 May
Brussels · Belgium

World Alliance for Wound and Lymphedema Care®

Support the WAWLC Podoconiosis Eradication Project in Ethiopia

AIMS OF THE WAWLC INITIATIVE:

- Training for 200 health care providers from 50 different hospitals, clinics and organisations
- Training to Health Extension Workers and local non-medical community agents, especially women
- Provision of kit (education material and supplies) for each participant to teach & treat patients
- Meeting with Ethiopian Ministry of Health in August 2011

Donations are welcomed at the EWMA Conference or at <http://wawlc.org/donation.html>

About Podoconiosis:

- An endemic non-filarial elephantiasis, commonly known as "Mossy Foot".
- Affects > 1 million people in rural villages of Ethiopia.
- Listed by WHO as neglected tropical disease in 2010.

EWMA has since 2009 been part of the WAWLC initiative.
